Coimbatore, India

B.Tech IT student who builds the backend first and the product around it. I lead a four-person team on **NexusCloud**, a multi-cloud storage router, and maintain **sidd-ai**, an open-source Java SDK for LLMs on Maven Central with 600+ downloads across 35+ organisations. Most comfortable in Java, Python and FastAPI; happy shipping Android too.

FLAGSHIP WORK

NexusCloud — Project Lead, NexusCloud-Orchestra (team of 4)

2026 · github.com/NexusCloud-Orchestra

- Pools the free tiers of seven providers (AWS, GCP, Azure, Cloudflare R2, Backblaze, Oracle, IBM) into one disk of 70 GB+ per user.
- Designed the Smart Router, which scores every connected bucket on free quota, egress cost, tier permanence and file fit before each upload.
- Files travel straight to the chosen bucket over presigned URLs, so the API never proxies a byte; I also own the backend core and the Docker / Cloud Run deployment.

FastAPI · Python 3.12 · PostgreSQL 16 · Redis 7 · React 18 · Docker · GCP Cloud Run

sidd-ai — Creator and maintainer, open source (Apache 2.0)

2026 · Maven Central

- One Java method talks to eight providers; the model string decides the route, so `claude-sonnet-5.5`, `gpt-6.1-sol` and a local `llama3.2` share the same call.
- 600+ downloads on Maven Central and 35+ organisations using it; launched on Product Hunt. Runs from a plain `main()` with no Spring and no YAML.

Java 17 · ModelRouter · JUnit 5 · Maven Central publishing

Swara — Solo: product design and engineering

2026 · Android + iOS

- Offline music player written in plain Java on Media3 and Room, with a queue, sleep timer, home-screen widget and a SwiftUI port for iOS.
- Eight colour themes, each clearing 7:1 text contrast, and zero network calls; the library lives in Room with versioned schema migrations.

Java 17 · Media3 / ExoPlayer · Room · MVVM · Glide · SwiftUI · GitHub Actions

OTHER PROJECTS

Return Risk Scorer — Python · ML · Gemini
Flags likely return abuse before an order ships; Gemini explains each score and every decision goes to an append-only log.

RetinaFace Inference — FastAPI · SQLAlchemy
Face detection service for F-A-L-C-O-N: boxes, five landmarks, annotated output and per-request metrics stored in SQL.

Phishing Detector — FastAPI · Chrome MV3
Chrome extension that scores each page against a FastAPI service and warns before you type a password.

PyRAG — LangChain · ChromaDB · FAISS
RAG pipeline that refuses to answer below a retrieval-score threshold and cites the chunk it used when it does.

SiddBot — Java 17 · LLMs
Chatbot toolkit with conversation memory, persistence and prompt-injection checks behind a builder API.

LifeLink — JavaScript · Gemini API
Emergency-help web app for PS-TECH-Solution that walks a bystander through first aid while help is on the way.

EXPERIENCE

Microsoft Azure AI Intern — AICTE virtual programme

2025

- Trained computer-vision models and ran training and deployment through Azure ML.

Frontend Intern — IBM SkillsBuild x Edunet Foundation

2025

- Built a blog as the capstone and deployed it to Vercel.

SKILLS

LANGUAGES	Java, Python, JavaScript / TypeScript, SQL, Swift
BACKEND	Spring Boot, FastAPI, Flask, PostgreSQL, Redis, JPA / JDBC, REST / OpenAPI
CLOUD / DEVOPS	Docker, Kubernetes, GCP Cloud Run, S3 / GCS / Azure Blob, GitHub Actions, Linux
MOBILE	Native Android (Java), Media3 / ExoPlayer, Room, MVVM, SwiftUI
APPLIED AI	LLM SDKs, RAG, LangChain, TensorFlow, OpenCV / MediaPipe, OpenAI / Gemini / Ollama

EDUCATION

Sri Shakthi Institute of Engineering & Technology, Coimbatore — 2024 – 2028
B.Tech Information Technology · CGPA 8.26
